Metaject 4 in 1

Metabolic treatment for Cattle and Sheep

Thanks for giving iO Metaject 4 in 1 another go. We have made some improvements and would love you to try it for yourself.

A compound mineral injection for the prevention and treatment of milk fever, grass tetany and allied mineral deficiency. Ready for instant use, Metaject should be used when an animal does not respond to calcium infusions as the animal may be lacking in magnesium or phosphorous.

In addition to calcium, it contains dextrose to assist with complications from Ketosis.

PRODUCT IMPROVEMENTS: What's changed since we launched?

1. New infusion bags
Sourced from Italy, they are manufactured by one of the world's largest and best infusion bag manufacturers supplying both human and veterinary pharma. Uses the same easy to use snap off levers.
2. Filling Equipment upgrade
Contract Manufacturer has upgraded filling equipment to alleviate sealing issues – no more burning or leaking.
3. Performed drop tests and pressure tests
 - Star Tracked cartons to Perth, Darwin and Adelaide return
 - Performed 200kg pressure tests – heavyweight standing test!
 - No leaks observed!
4. Over 20,000 packs now sold since first batch with no further sealing issues.
5. Note: Occasional droplets can be seen in plastic outer bag.
This is normal, and is a result of the filling process.
6. Outer bags pre-cut for easy opening.
