For the protection of sheep, either off-shears or with any length wool, against fly strike (*Lucilia cuprina*) for 18 to 24 weeks.

For the protection of mulesing and marking wounds on sheep against fly strike (*Lucilia cuprina*) during the wound healing process.

GENERAL DIRECTIONS:

iO Flyk Spray-On provides season long protection to sheep against body, breach and poll strike and may be used either off-shears or on sheep with any length wool. *iO Flyk Spray-On* also protects mulesing and marking wounds on lambs against fly strike during the wound healing process. The dose volume is determined by the weight of sheep being treated. Apply *iO Flyk Spray-On* according to the diagrams and tables in the Directions for Use. DO NOT DILUTE. Apply directly from the container or an appropriate back pack using a spray-on applicator gun recommended by The Hunter River Company. *iO Flyk Spray-On* may be applied to all breeds of sheep to obtain protection against fly strike.

WITHHOLDING PERIODS:

MEAT: DO NOT USE less than 28 days before slaughter for human consumption.

MILK: DO NOT USE on sheep which are producing or may in the future produce milk or milk products for human consumption.

WOOL HARVEST INTERVAL: DO NOT USE less than 3 months before shearing or fibre collection.

TRADE ADVICE – EXPORT SLAUGHTER INTERVAL (ESI): DO NOT use less than 120 days before slaughter for export.

Use of this product may result in wool residues that may not comply with European Union environmental quality standards.

Wool treated with this product may contain detectable residues; adequate treatment records should be kept and made available, if requested by wool buyers.
