**Supports
Respiratory Function**

PulmonAID[®] Paste

Pulmonary and Respiratory Support

PulmonAID Paste is a unique supplement that contains a concentrated boost of vitamins, minerals and plant extracts to provide short-term and convenient pulmonary and respiratory support.

The benefits:

- ✓ Supports normal pulmonary and respiratory function
- ✓ Concentrated nutritional boost for all performance horses
- ✓ Maximises stamina and endurance
- ✓ Short-term support for the pulmonary inflammatory response
- ✓ Convenient syringe application
- ✓ Ideal for travelling and competition

**EFFECTIVE
RESPIRATORY
SUPPORT**

**STAMINA AND
ENDURANCE**

**EASY
TO USE**

PulmonAID® Paste

Ingredients

Per 30g: Vitamin C 3,125 mg, L-Carnitine 1,000 mg, Dimethylglycine (DMG) 500 mg, Grape Seed Extract 250 mg, Hawthorn Extract 150 mg, Oat Straw Extract (source of silica) 110 mg, Bioflavonoid Complex 500 mg, Vitamin A 54,000 IU, Vitamin D3 2,148 IU, Vitamin E 64 IU, Chlorophyll.

How does PulmonAID Paste work?

PulmonAID Paste contains a unique formulation that assists in the efficiency of oxygen and nutrient delivery throughout the body and supports the pulmonary inflammatory response to help with stamina and endurance while at the same time supporting normal respiratory function.

Amino Acids

- **DMG:** Helps oxygen uptake in the bloodstream, helping to delay the change from anaerobic to aerobic exercise.
- **L-Carnitine:** Buffers against lactic acid by creating a reservoir of carnitine in the muscles prior to exercise to limit the initial use of glycogen energy stores. The delay in glycogen depletion delays lactic acid production, supporting overall endurance.

Antioxidants

- **Grape Seed Extract:** Contains oligomeric proanthocyanidin complexes (OPCs) which are naturally occurring plant metabolites known for their potent antioxidant activity to support healthy capillaries.
- **Chlorophyll:** Whilst being a potent antioxidant it can also assist with dissolving mucous by supporting the inflammatory response.
- **Bioflavonoid Complex:** Provides a source of hesperidin and rutin which are known for their antioxidant capabilities to assist with supporting the normal integrity and function of the lungs.
- **Hawthorn Extract:** Supports heart health.

Vitamins

- **Vitamin C:** Horses suffering from Equine Asthma have been shown to have lower levels of vitamin C in lung secretions than horses without asthma. Supplementing with vitamin C can support horses experiencing oxidative stress in their lungs.
- **Vitamin E:** An essential nutrient that has antioxidant abilities to assist with protecting cells from oxidative stress during exercise.
- **Vitamin A:** Has antioxidant capabilities and supports chlorophyll's activity.
- **Vitamin D3:** High levels of vitamin D in the blood can assist with superior lung function.

Natural source of silica

- **Oat Straw Extract:** Provides a source of bioavailable silica. The silica can support healthy blood vessels and capillary walls.

Available size

30g syringe

Directions for use

PulmonAID Paste is designed to be mixed in the horse's feed.

Prior to competition or strenuous exercise: Give ½ tube each day for 4 days.

On the day of competition or strenuous work: Give 1 full tube 2 hours prior to the event.

PLEASE NOTE: If you are using **PulmonAID** daily, substitute **PulmonAID Paste** just on the day of the competition.

Use in accordance with competition rules and regulations.

Feeding recommendations are for 500kg bodyweight.
