Calcium supplementation may not be required for your pet depending on their daily diet and other health needs. The above DIRECTIONS are only a guide, we recommend consulting your preferred veterinarian before using this product.

Contact Vetsense:

## *Why would I use VETSENSE CALCIUM SYRUP for my puppy or dog?*

### **GROWTH AND DEVELOPMENT**

Calcium is essential for the development of strong bones and teeth, particularly during the early stages of a puppy's life.

### **LARGER DOG BREEDS**

Have a higher risk of developmental orthopaedic diseases, such as hip dysplasia. Calcium supplementation may be recommended to support healthy bone growth in these breeds.

### **PREGNANT AND LACTATING DOGS**

have increased calcium requirements to support the development of puppies and milk production. Calcium supplements may be recommended to meet these increased needs.

### **IMBALANCED DIET**

If your dog's diet is deficient in calcium or has an imbalanced calcium-to-phosphorus ratio, a calcium supplement may be suggested to maintain optimal nutrient balance.

## *Why would I use VETSENSE CALCIUM SYRUP for my kitten or cat?*

### **GENERAL HEALTH DISORDERS**

Relating to certain forms of kidney issues may require calcium supplementation. This should only be done under the guidance of a veterinarian.

### **HOMEMADE DIETS**

If you prepare homemade diets for your cat, it's crucial to ensure that the diet is nutritionally balanced, including appropriate levels of calcium.

A veterinarian or veterinary nutritionist can help formulate a balanced diet and determine if calcium supplementation is necessary

### **LACTATING QUEENS (MOTHER CATS)**

Have increased calcium requirements to support milk production. In some cases, calcium supplementation may be recommended to prevent calcium deficiency during this period.
